The Commission 1920 Overview The Commission 1920 is a turn-based strategy game set in the roaring 1920s where you play as a Don of a mafia family. The goal is to manage your resources and win the war, but this is made a bit more difficult by the wild nature of the game. The world is constantly changing as the seasons and games progress, and this adds a rather fresh feel to The Commission 1920 and brings a lot of variety. Although the game tries to be realistic, it is still a typical mafia family, a bit hard to kill and fully motivated by the need for money. Some characters have a limited number of actions in a turn, which again adds a realistic feel to the game. Somewhere in the Middle History of the game in the beginning, the game went through some rough patches. The update added many new features to the game such as in-game events, a setting of the Mafia with some more depth, and added a few more choices in the combat system. The update is still in the early stages of testing (but works just fine). The possibility of playing as a rival family was removed due to lack of time and a few bugs that were found in the implementation. The update has a different feel to it compared to the previous update and if I remember correctly, it is the first time that the whole game was rewritten from scratch. Also, the implementation was much more complex and much more time was spent on the game. The result is a very polished, albeit complex, game that is quite a bit different from the original game. However, the most important feature that came along with the update was the second part of the Legendary update, which is the main focus of this guide. The second part of the Legendary update added the ability to play as a rival family, which is what this guide is about.
